- Hygienic and hypoallergenic
- Filling made from climate regulating hollow fibres
- Height adjustable with removable filling
- Elastic and reshapeable
- Entire pillow washable at up to 60°C

#### Our Certifications:

The SilverMed® Plus Orthopaedic Pillow provides the correct orthopaedic support for the head and neck area and is designed so that it can be adjusted to individual needs and preferences. Like all other parts of the Wenatex Sleep System, the pillow is made from materials that provide a hygienic sleep environment.

The outside cover is made from 100% cotton sateen, used for its breathability, durability and softness, with SilverMed® fibre woven through for its hygiene and climate regulating properties. An inner case, made from cambric cotton, contains a filling of climate regulating hollow fibres.

These fibres offer a high level of elasticity, deliver excellent heat efficiency and ensure great air circulation, providing you with the support and comfort needed for a good night's sleep. You have control over the height and firmness of your pillow as you can remove filling and shape your pillow to suit your personal preference and ensure an orthopaedically correct sleeping position.
