

wenaCel® sensitive Orthopaedic Mattress

The wenaCel® sensitive orthopaedic mattress sets new standards when it comes to healthy and regenerative sleep.

Characteristics of the mattress cover:

- Sanitized® hygiene function
- Natural moisture management
- Skin flora neutral
- 5-zone quilting for optimal formfitting comfort of the body
- All-round airwave tape for better ventilation
- Product class 1 according to OekoTex Standard - ideally suited for babies and small children
- Washable at 60 °C

Characteristics of the wenaPur® cold foam core:

- Cold foam core with optimised moisture management due to the integration of TENCEL™ Lyocell powder
- Unique surface modification technology, cut in brook pebble design providing anatomically correct sinking depth while avoiding pressure points
- Excellent point elasticity due to open-pore cell structure
- Above average density of 50 kg/m³
- Optimal breathability
- Extremely durable
- Available in all regular sizes
- Custom sizes upon request
